GOVNOR PAYNE

Software Engineer | Full-Stack Development | Automation & Systems Integration

Austin, TX | (512) 876-5899 | govnorpayne@gmail.com | linkedin.com/in/bernardpaynejr | github.com/GPain2007

PROFESSIONAL SUMMARY

Software engineer experienced in full-stack and backend development, APIs, automation, data pipelines, cloud applications, testing, debugging, and systems integration. Skilled in Python, JavaScript, TypeScript, Java, PHP, SQL, React, Node.js, REST APIs, Git/GitHub, Linux/Bash, AWS/Azure, ETL, data analytics, and AI-assisted development. Brings 10+ years of additional technical leadership and systems experience involving networking, automation, root-cause analysis, and mission-critical operations.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, PHP, SQL, HTML, CSS, Bash
Frameworks & Web: React, React Native, Node.js, Express.js, FastAPI, Flask, Django, REST APIs, Selenium
Data & Databases: PostgreSQL, MySQL, MariaDB, SQLite, Pandas, NumPy, ETL, Plotly, Dash, Tableau, ArcGIS
Cloud & DevOps: AWS, Microsoft Azure, Git/GitHub, Linux, Bash, Heroku, Vercel, Kinsta, Docker, CI/CD
Systems & Integration: TCP/IP, LAN/WAN, BACnet, Modbus, MQTT, OPC-UA, PLCs, API and system integration
AI Tools: ChatGPT, Claude, Gemini, Microsoft Copilot, AI-assisted development and workflow automation

SOFTWARE ENGINEERING EXPERIENCE

SkipForward | Software Engineer (Contract)
Austin, TX | Apr 2026–Present

- Develop scalable Python backend applications and automation solutions for AI integration with email and PR system, with increase response time by 92% in most systems.
- Integrate cloud technologies, REST APIs, analytics, and AI-driven workflows into production systems.
- Collaborate across engineering teams to deliver reliable, maintainable software through code review and testing.

EcoRise | Software Engineer / Technology Specialist
Austin, TX | Jan 2023–Aug 2025

- Designed, debugged, and implemented Python- and React-based applications, dashboards, and data visualization solutions.
- Developed APIs, analytics tools, ETL workflows, and cloud integrations using Plotly, ArcGIS, AWS, Azure, Git/GitHub, and Jupyter.
- Performed root-cause analysis across web applications, deployments, user access, cloud services, and system performance issues.
- Used ChatGPT, Claude, Gemini, and Microsoft Copilot to support development, users, and workflow automation.
- Created technical documentation, supported stakeholders, and communicated technical concepts to faculty, staff, students, and organizational users.

Mozilla | Open Source Software Engineer
Austin, TX | Aug 2022–Present

- Resolved PerfCompare issues using React, React Native, Material UI, Python, code tracing, state analysis, and API integration testing.
- Improved FoxPuppet browser automation using Python and Selenium WebDriver, refining selectors, waits, error handling, and session management.
- Analyzed stack traces and runtime behavior to improve application stability, performance, automation reliability, and maintainability.

Softkodes | Junior Software Engineer
Effurun, Nigeria | Jul 2022–Jan 2023

- Developed modular, production-ready React, Node.js, and Python web and backend applications in an Agile environment.
- Collaborated with analysts, architects, and QA teams to design, test, debug, and deliver end-to-end software solutions.

PROJECTS

FastAPI Notes API | github.com/GPain2007/

- Built a RESTful notes API in Python with FastAPI, tested with pytest.
- Designed a GitHub Actions CI/CD security pipeline running ruff, pytest, bandit, pip-audit, and gitleaks.
- Added CodeQL semantic analysis and Trivy container scanning to catch code and dependency vulnerabilities before deployment.

TECHNICAL LEADERSHIP EXPERIENCE

University of Texas at Austin | Facilities Supervisor – HVAC Instrument & Controls
Austin, TX | 2025–Present

- Monitor and optimize multi-vendor networked automation systems including Johnson Controls Metasys, Trane, and Honeywell.
- Review and modify control sequences, troubleshoot communications, support commissioning, and optimize system performance.
- Coordinate with facilities staff, IT, and vendors on automation infrastructure, networking, and technical integrations.

- Provide Metasys and Reliant Controls training and lead team members in HVAC and instrumentation/controls diagnostics and repair.

CBRE | Chief Building Engineer
Austin, TX | 2014–2020
- Led building automation installation, programming, diagnostics, and maintenance across Class A commercial facilities.
- Managed engineering teams, emergency response, preventive maintenance, vendor coordination, and controls upgrades.
- Applied systems troubleshooting, networking, technical leadership, and root-cause analysis in operational environments.

EDUCATION & CERTIFICATIONS

Western Governors University (WGU) — Bachelor of Science, Computer Science | Expected 2027
University of Texas — Professional Certificate, Full Stack Software Engineering
Austin Community College — Associate Degree, HVAC
IBM — Backend Development Certificate
Google — Google IT Certificate
